REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 18 October 2008 has been entered.

The lubricating oil composition of independent claim 1 has been amended to include that component (C), the alkali metal borate or a hydrate thereof, is present in an amount of 0.002 to 0.06 percent in terms of boron, based on the total mass of the composition. This amount of boron from the alkali metal borate or hydrate thereof is lower than the amount of boron from the hydrated alkali metal borate in the closest prior art to Adams (3,853,772) which was applied against the claims under 35 USC 103 in the parent application. Specifically, Adams discloses hydrated alkali metal borates having the formula $M_2O-xB_2O_3-yH_2O$ in which x = 0.68 to 4 and y is a number up to 5. Thus, the minimum possible amount of boron when M = potassium, x = potassium0.68 and y = 5 is 6.5 weight % boron in the borate. When added to a lubricating oil composition in the lowest amount taught in Adams, that of 1 weight %, the amount of boron in the composition is 0.065%. However, from the examples in Adams, it is clear that much higher amounts of the borate are typically used; Examples 1-13 contain 0.33 to 0.65 weight % boron in the oil compositions. Further, the Examples in the present application contain 0.007 to 0.04 mass % boron in the oil compositions which demonstrate effective results in the properties of antiwear and fatigue life.

Application/Control Number:

Art Unit: 1797

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ellen M. McAvoy whose telephone number is (571) 272-1451. The examiner can normally be reached on M-F (7:30-5:00) with alt. Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on (571) 272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
